

About the job:

**iFarmer Limited** is looking for Quality Assurance Engineer (Automation)

Job Description / Responsibility:

Develop and execute test cases for web and mobile applications, ensuring functional and regression coverage. Build and maintain automation frameworks using Playwright, Selenium, Cypress, or similar tools. Conduct UI, API (Postman, SoapUI), and basic performance testing (JMeter). Identify, document, and track defects in JIRA while collaborating closely with developers. Participate in Agile ceremonies, contributing to sprint planning and quality strategies. Enhance QA processes, introduce best practices, and explore emerging automation tools. Work independently in a fast-paced environment, ensuring timely defect resolution and seamless releases.

Educational Requirements:

Bachelor of Science (BSc) in Computer Science & Engineering

Skills Required: Selenium, Software Quality Assurance, Agile methodology, JavaScript, JMeter, API Development, DOM and UI, Cypress, Playwright.

Experience Requirements:

- 2-3 years in software testing with expertise in manual and automation testing.
- Proficiency in JavaScript/TypeScript, test frameworks, DOM manipulation, and CI/CD pipelines.
- Strong problem-solving skills with the ability to manage sprint execution autonomously.
- Experience handling multiple priorities while maintaining high-quality standards.

Job Location: Dhaka (GULSHAN 2)

Salary: Tk. 35000 - 55000 (Monthly)
