Career Objective

Motivated and detail-oriented Computer Science graduate seeking an internship opportunity as a Software Quality Assurance (SQA) Intern at SpaGreen Creative. Passionate about software testing, quality assurance processes, and ensuring seamless user experiences. Eager to apply my knowledge of software testing principles and gain hands-on experience in a professional setting.

Education

Bachelor's in Computer Science & Engineering

American International University-Bangladesh

Expected Graduated Year: 2025

Skills

- Basic understanding of software testing principles
- Familiarity with software development processes
- Knowledge of web technologies (HTML, CSS, JavaScript)
- Strong attention to detail and problem-solving skills
- Good communication and collaboration skills
- Familiarity with testing tools (e.g., Selenium, JIRA, TestRail)
- Ability to learn and adapt to new technologies quickly

Projects & Experience

Bug Tracking System (University Project)

- Developed a simple bug tracking system where users could report, assign, and track bugs in software projects.
- Conducted manual testing to identify issues and improved system functionality.
- Created test cases and test reports to document system performance and bug resolution.

E-commerce Website Testing (Personal Project)

- Tested an e-commerce website for usability, performance, and security issues.
- Performed functional testing, UI/UX testing, and cross-browser testing.
- Documented test results and suggested improvements to enhance the user experience.

Automated Testing with Selenium (Self-Initiated)

- Created automated test scripts using Selenium WebDriver for a sample web application.
- Implemented test automation for login functionalities and form submissions.
- Learned debugging and reporting techniques to track and resolve issues efficiently.

Certifications & Training

- **Software Testing Foundations** – LinkedIn Learning
- **Selenium WebDriver with Python** – Udemy
- **Introduction to JIRA for Testers** – Coursera
- **Web Development Basics (HTML, CSS, JavaScript)** – FreeCodeCamp

Why SpaGreen Creative?

- Passionate about contributing to a leading software company with innovative projects.
 - Eager to learn from experienced SQA engineers and work on real-world applications.
 - Excited about a collaborative work environment that fosters growth and skill development.
-
