## Career Objective

Highly motivated and detail-oriented Quality Assurance Engineer with 2+ years of experience in manual and automation testing. Proficient in test automation frameworks like Playwright, Selenium, and Cypress. Seeking an opportunity at iFarmer Limited to contribute expertise in Agile methodologies, API testing, and CI/CD integration to enhance software quality and user experience.

---

## Education

### Bachelor of Science in Computer Science & Engineering

American International University-Bangladesh, Year of Graduation: 2025

---

## Skills

- **Automation Testing:** Playwright, Selenium, Cypress
  - **Manual Testing:** Functional, Regression, UI, and Performance Testing
  - **API Testing:** Postman, SoapUI
  - **Performance Testing:** JMeter
  - **Programming & Scripting:** JavaScript, TypeScript
  - **Bug Tracking & Management:** JIRA
  - **Agile Methodologies:** Sprint Planning, Quality Strategies
  - **CI/CD Integration:** Jenkins, GitHub Actions
  - **DOM Manipulation & UI Testing**
  - **Strong Problem-Solving & Communication Skills**
-

## Work Experience

### Quality Assurance Engineer

XYZ Software Ltd., Dhaka, Bangladesh | June 2023 – December 2024

- Developed and executed test cases for web and mobile applications, ensuring functional and regression coverage.
  - Built and maintained automation frameworks using Playwright and Selenium.
  - Conducted API testing using Postman and performed basic performance testing with JMeter.
  - Identified, documented, and tracked defects in JIRA, collaborating closely with developers for resolution.
  - Participated in Agile ceremonies, contributing to sprint planning and quality strategies.
  - Enhanced QA processes by implementing best practices and introducing emerging automation tools.
  - Worked independently in a fast-paced environment to ensure timely defect resolution and seamless releases.
- 

## Projects & Achievements

### E-commerce Platform Automation

- Developed an end-to-end automation suite for an e-commerce platform using Cypress.
- Reduced manual testing effort by 60% through automated regression testing.
- Integrated automated test execution in CI/CD pipelines.

### Banking Web Application Testing

- Led functional and API testing for a banking web application.
- Designed and executed test cases to ensure compliance with security standards.
- Automated test execution with Selenium and reported defects via JIRA.

### Performance Testing for SaaS Application

- Used JMeter to simulate high traffic loads and analyze system performance.
  - Identified bottlenecks and provided optimization suggestions to the development team.
- 

## Certifications & Training

- **Certified Tester – ISTQB Foundation Level**
- **Selenium WebDriver with JavaScript – Udemy**
- **API Testing with Postman – Coursera**
